Thank you for purchasing a high quality genuine Lumen Rooflight Blind

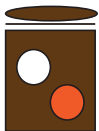

Please follow the instructions to ensure your blind is fitted correctly

- Locate on your Rooflight the pre machined holes in the frame at the top and the bottom.
- The brackets supplied are different for the top and the bottom, the bracket has a countersunk hole and are labelled appropriately.
- Fix brackets using the supplied screws (under no circumstances are alternative screws to be used as this may result in damaging the glass).

BRACKET ORIENTATION

● = HOLE FIXING POSITIONS

- Clip the top of the blind (the rail furthest from the handle) into the brackets at the top of the window
- Carefully unwind all cords and clip in the bottom rail (the rail with no fabric attached to it). This will need a slight amount of force as the cords need a certain amount of tension to work.
- Ensure blind is central in the window and this is now ready to operate.

These are proudly made here in Devon and will provide you with many years of service.
Should you experience any problems do not hesitate to call us and we will be glad to help.

Kind regards The Lumen Rooflight Company
